UKRAINE FRONTLINE DAILY STRATEGIC INTELLIGENCE REPORT

Integrated open-source assessment of the frontline, territorial changes and operational trends

JELENTÉS DÁTUMA	ADATLEZÁRÁS	JELENTÉS TÍPUSA
November 12, 2026	**2026-11-12 00:55 UTC**	**Daily automated strategic situation assessment**

Verified dashboard data → analytical interpretation → strategic situation picture

Purpose of the Report

The report organises indicators already produced and published by the dashboard into a strategic situation picture. It does not recalculate core KPIs. Event and context files are used only to interpret the existing figures.

Core methodological rule
The dashboard calculates; the PDF interprets. Missing values are shown as unavailable rather than zero or a model-generated estimate.

Data Sources and Their Role

Data file	Role	Use
docs/data/dashboard_current.json	Primary KPI source	Final 1 / 7 / 30 / 90-day indicators
docs/data/front_activity_latest.json	Frontline activity summary	Most active sector, threat level, prepared assessment
data/dashboard_long_term_summary.json	Long-term summary	Prepared monthly, yearly and control-area figures
data/deep_strikes_summary.json	Weekly deep-strike summary	Prepared weekly KPIs and assessment; no recounting
docs/data/satellite/satellite-metadata.json	Satellite metadata	Image update, coverage and cloud cover

Report at a Glance

4,5 km² Russian daily territorial gains	**0,0 km²** Ukrainian daily recaptures	**4,5 km²** Published net change
1 FIRMS hotspots, 24 hours	**0,0** Conflict index	**0** OSINT events
- Most active sector	**-** Highest threat level	**MEDIUM** Data-confidence level

Executive Summary

The published daily dashboard reports 4,5 km² of Russian territorial gains and 0,0 km² of Ukrainian recaptures. The PDF reproduces these values unchanged from docs/data/dashboard_current.json.

The daily feed reports 1 FIRMS hotspots, 0 OSINT events and a conflict index of 0,0. The PDF does not recalculate these indicators.

The frontline activity summary identifies - as the most active sector. The highest indicated threat is in -, rated -.

Assessment data-confidence level: MEDIUM. Most core daily indicators are available, but some analytical context fields are missing.

Territorial and Operational Indicators

Period	RU gains	UA recaptures	Published net	FIRMS	Index	OSINT
24 hours	4,5 km²	0,0 km²	4,5 km²	1	0,0	0
7 days	21,4 km²	0,0 km²	21,4 km²	375	-36,0	13
30 days	126,1 km²	82,5 km²	43,5 km²	27 340	-36,0	13
90 days	0,0 km²	0,0 km²	0,0 km²	27 340	-36,0	13

Important interpretation note
Every figure above is read directly from the published periods block in dashboard_current.json. The PDF does not derive differences, add polygons or recount events.

Front sectors - published daily values

Sector	Description	Risk	Score	RU	UA	FIRMS	OSINT
Kostiantynivka–Csasziv Jar	védelmi csomópontok térsége	MODERATE	40	4,2 km²	0,0 km²	0	0
Ukrán hátország	mélységi csapások és infrastruktúra	MODERATE	30	0,0 km²	0,0 km²	1	0
Kupjanszk–Liman	északi hadműveleti nyomás	MODERATE	8	0,4 km²	0,0 km²	0	0
Dél-Donyeck	szakaszos területi mozgás	MODERATE	3	0,0 km²	0,0 km²	0	0
Herszon	alacsonyabb területi dinamika	MODERATE	3	0,0 km²	0,0 km²	0	0
Krím	csapások és légvédelmi aktivitás	MODERATE	3	0,0 km²	0,0 km²	0	0
Pokrovsk	folyamatos szárazföldi nyomás	MODERATE	3	0,0 km²	0,0 km²	0	0
Zaporizzsja	korlátozott, de növekvő aktivitás	MODERATE	3	0,0 km²	0,0 km²	0	0

Key 24 / 48 / 72-hour events

Window	Type	Event	Value	Confidence	Source	Note
48 h	Orosz területi nyereség	Kostiantynivka–Csasziv Jar	4.18 km²	Magas	Területi delta	A gördülő frontgeometria a küszöbértéket meghaladó területi változást azonosított.
48 h	General Military Update	Ukrainian Strikes on Russian Oil Refineries: Russia’s Oil Processing Falls by a Third as the Aggressor’s Fuel System Loses Resilience	8/10	Közepes	ArmyInform	Ukrainian Strikes on Russian Oil Refineries: Russia’s Oil Processing Falls by a Third as the Aggressor’s Fuel System Loses Resilience
48 h	General Military Update	From Ukrainian Initiative to NATO Standards: Ninth Strategic Communications Course for Ukraine’s Defence Forces concludes	8/10	Közepes	ArmyInform	From Ukrainian Initiative to NATO Standards: Ninth Strategic Communications Course for Ukraine’s Defence Forces concludes
48 h	Rendkívüli FIRMS-klaszter	44.89, 44.48 térsége	14 hőpont	Közepes	NASA FIRMS	A térben koncentrálódó hőpontok száma meghaladta az automatikus riasztási küszöböt. A hőpont önmagában nem bizonyít katonai eseményt.
72 h	Orosz területi nyereség	Kostiantynivka–Csasziv Jar	4.18 km²	Magas	Területi delta	A gördülő frontgeometria a küszöbértéket meghaladó területi változást azonosított.
72 h	Orosz területi nyereség	Kupjanszk–Liman	1.61 km²	Magas	Területi delta	A gördülő frontgeometria a küszöbértéket meghaladó területi változást azonosított.

Window	Type	Event	Value	Confidence	Source	Note
72 h	General Military Update	Gasoline as an Indicator of Russia’s Vulnerability: How Ukrainian Strikes on Oil Refineries Are Triggering a Fuel Crisis in Russian Regions	8/10	Közepes	ArmyInform	Gasoline as an Indicator of Russia’s Vulnerability: How Ukrainian Strikes on Oil Refineries Are Triggering a Fuel Crisis in Russian Regions

Long-Term Strategic Situation

-	-	-
Under Russian control	Current monthly RU gains	Current monthly UA recaptures
-	-	-
Current yearly RU gains	Current yearly UA recaptures	No new long-term metric is derived

The long-term data file contained no directly usable narrative assessment. The PDF therefore does not generate an independent strategic conclusion.

Deep Strikes - Latest Published Weekly Summary

Data frequency: weekly
Coverage period: -. Validation status: -. The PDF uses the prepared deep_strikes_summary.json and does not recount events from deep_strikes.json.

-	112	106
Published weekly events	UA → RU	RU → UA
-	-	-
Affected locations	Most frequent target type	Validation

Satellite Data Update

Indicator	Published value
Metadata update	2026-11-11T12:57:42Z
Latest image date	-
Coverage	-
Cloud cover	-
Images / scenes	-

Satellite metadata provide observational context. The PDF does not infer damage or military activity solely from the existence of an image.

Integrated Assessment and Uncertainty

Data-confidence level: MEDIUM
Most core daily indicators are available, but some analytical context fields are missing.

The report identified several missing or unclear fields and therefore avoids a firm strategic momentum classification. Available published indicators are presented, but missing values are not replaced with independent calculations.

Methodology

Rule	Application
1. Fő KPI-k	Only prepared values from docs/data/dashboard_current.json.
2. Hiányzó adat	Shown as unavailable; never replaced with zero or an estimate.
3. Területi adatok	The PDF does not calculate area from GeoJSON.
4. FIRMS	Uses the published firms_count field; does not count points.
5. Mélységi csapások	Uses weekly summary and validation files; no event recounting.
6. Szöveges értékelés	Explains relationships between prepared indicators without creating new numerical results.

Legal and Methodological Disclaimer

This report is an open-source analytical product. It is not military, legal, investment or official government advice. Source data may be delayed, partial or contradictory.
